## PROFILE

I am a highly motivated and passionate Full Stack developer with a strong interest in technology. I have a solid foundation in Full Stack development, data manipulation, and web scraping. I am always looking for opportunities to learn and improve my skills, and enjoy exploring new tools, languages, and frameworks. I am confident in my ability to adapt to new technologies and approaches, and am dedicated to staying up-to-date with the latest industry developments.

## SKILLS

- Front-End Skills: HTML, CSS, Javascript
- Back-End Skills: Python, Flask, BeautifulSoup, MySQL
- Software Components and Libraries
- Time Management and Prioritization
- Complex Problem Solving
- Responsive Web Design
- User Experience Design
- Web and Application Servers
- Version Control Systems: Git, Github

## EXPERIENCES

### Electronics Technician

Intercircuit  
2000 - 2012

- While working in this role, I developed a range of technical skills, including conducting team training, researching, testing and repairing electronic equipment, programming microcontrollers, and designing circuit boards. I also gained experience in developing assembly code for microcontrollers and gained a strong understanding of electronic systems and components.

### Owner and technician

Triac Soluções em eletrônica  
2012 - now

- As a business owner, I gained valuable experience in leadership and management, including overseeing all company processes and employees. I was responsible for recruitment, training, and employment support, as well as financial and time management. I also played a key role in developing business strategy. Through this role, I developed strong skills in organization, problem-solving, and decision-making.
